

I would like to enter my desire the the FCC would not
Implement any proposal that would lessen Indiana Telephone
Privacy law protections. Indiana Privacy law has improved
my time at home/ it has been effective in I used to receive 12 calls per week,
now I only receive one. This is
especially important for the elderly who are free of the
many telephone scams that target this age group, with the
Indiana law they are protected from this type of solicitation. Please consider
these requests before making
changes that will change this protection.
